ALEKSIS BOJARUNS

Unity Developer | Gameplay Programmer | Game Developer

aleksisbojaruns@gmail.com • in/aleksis-bojaruns • Portfolio

Summary

An award-winning game developer who has experience from gameplay programming through multiplayer architecture, all of the way to backend integration, mobile development, and everything in between. Equally effective working independently or leading a small studio, with shipped titles across both. Proficient across Unity, Unreal Engine, C#, C++, and a range of cloud and backend services including PlayFab, Azure, and Supabase.

Skills

Unity, Unreal Engine, Git, Jira, C#, C++, Blender, Maya, FMOD, Photoshop, PlayFab, Azure, Meta Quest 2

Experience

The Semigallian Games — Latvia, Remote

Game Director | Lead Developer — 02/2026 - Present

- Directed a small team of developers alongside half a dozen of freelancers to ship an online multiplayer game from scratch in 6 months.
- Integrated PlayFab MPS and Photon Fusion 2 to create server-authoritative sessions up to 8 players.
- Architected and implemented core multiplayer systems including session management, player state replication, and real-time in-game moderation features.
- Owned the full Steam publishing pipeline end-to-end from store page setup and copywriting through Steamworks.NET integration, and platform compliance.

On The Block Gaming Ltd — UK, Remote

Unity Developer — 07/2025 – 11/2025

- Main developer of an interactive presentation platform (Kahoot-style) where audiences join live sessions on their phones, follow slide progress in real time, and compete in minigames during the presentation, backed up with live leaderboards and scoring.
- Contributed to Step Pets, a real-time map-based mobile game, implementing PlayFab and Azure economy and inventory systems alongside UI and gameplay improvements.
- Worked across 5 mobile and WebGL projects delivering gameplay features, UI implementation, and PlayFab backend integration including economy and player data.

ExcITed NTNU — Norway, Remote

Application Developer — 05/2025 – 08/2025

- Developed a Unity production management tool for filmmakers covering all project tracking aspects.
- Implemented full user authentication and real-time data synchronization via Supabase.

Education

Nord University — Levanger, Norway

Bachelors of Game and Entertainment Technology — 08/2022 – 06/2025

Projects

Life Under Pressure

Award-winning game recognized at the Norwegian Game Awards 2025 for Best Audio Design, developed collaboratively as part of a student team. https://www.gameawards.no/winners/life-under-pressure

Behavior Tree Graph Unity Tool

A custom Unity editor tool for visualizing and editing AI behavior trees, independently designed and published to the Unity Asset Store. https://assetstore.unity.com/packages/slug/312651
